THE DETAILS

OverDub Club sessions will help children build group skills and friendships, using music to support with emotional regulation and building resilience. We will accept interest in the programme from children representing the full range of neurodivergence. The programme is open to children and young people with a formal diagnosis as well those where some form of neurodivergence is suspected and/or the child is undergoing assessment.

Sessions will be structured around the needs and interests of the actual children attending as far as possible. There will be an option to tell us whether your child would prefer individual sessions, sessions in a pair [with another participant], or small group sessions. However, as a key aim for the project is to build social connections, there will be an expectation for every child to progress to some form of collaboration over the sessions.
